THIRTEENTH
ANNUAL REPORT
OF THE
Medical Officer of Health
FOR THE
United Districts
OF
WEST GLOUCESTERSHIRE
FOR THE YEAR
1925

THIRTEENTH

ANNUAL REPORT

OF THE

Medical Officer of Health

FOR THE

United Districts

OF

WEST GLOUCESTERSHIRE

FOR THE YEAR

1925

WEST GLOUCESTERSHIRE
COMBINED DISTRICT

RURAL : GLOUCESTER, EAST DEAN AND
LYDNEY.

URBAN : AWRE, WESTBURY-ON-SEVERN AND
NEWNHAM-ON-SEVERN.

MEDICAL OFFICER OF HEALTH :

SURGEON CAPTAIN O. W. ANDREWS, C.B.E., R.N.
Residence, St. Briavels.

*To the Chairman and Members of the Urban and Rural Districts
forming the West Gloucestershire Combined District.*

GENTLEMEN,

13th May, 1926.

I have the honour to lay before you my Annual Report
for the year 1925.

I am, Gentlemen,

Your obedient servant,

O. W. ANDREWS,

PUBLIC HEALTH STAFF

Medical Officer of Health :

Residence, St. Briavels. Tel. St. Briavels 13

Sanitary Inspectors :

Gloucester Rural—

MR. G. H. RAWLING, A.R.S. INST., Berkeley House, Berkeley Street, Gloucester. Tel. 124 Gloucester.

East Dean and United Parishes Rural District—

MR. A. W. COLLINSON, Oak Cottages, Lower High Street, Cinderford. Tel. 66 Cinderford.

Lydney Rural—

MR. GEO. J. ELLIOTT, M.R.S.I., M. INST., M.S.E., Highland Villa, Tutnalls, Lydney. Tel. 54.

Assist. San. Inspector :

MR. G. J. ELLIOTT, Junior.

Awre. Newnham and Westbury Urban Districts—

MR. H. E. W. HOOK, M.R.S. INST., The Weighbridge, Westbury-on-Severn. Tel. 11 Westbury.

Health Visitor :

East Dean. Cinderford and Drybrook Districts—

MISS SOMERFIELD, Argyle House, Church Road, Cinderford

Superintendents Infectious Hospitals :

Wilderness—

MR. A. E. TEAGUE, Heywood Road, Cinderford.
Tel. 66 Cinderford.

Greenway Smallpox—

MR. A. W. COLLINSON, Greenway Smallpox Hospital
Tel. 66 Cinderford.

The M.O.H. is a whole-time officer, and one-half of his salary is, contributed from Exchequer grants.

TABLE I.—BIRTH-RATE, DEATH-RATE, AND ANALYSIS OF MORTALITY DURING THE YEAR 1925.

(Provisional figures. Populations estimated to the middle of 1925 have been used for the purposes of this Table. The mortality rates refer to the whole population as regards England and Wales, but only to civilians as regards London and the groups of towns).

	BIRTH-RATE PER 1,000 TOTAL POPULATION	ANNUAL DEATH-RATE PER 1,000 POPULATION								RATE PER 1,000 B-RTHS		PERCENTAGE OF TOTAL DEATHS			
		All Causes	Enteric Fever	Small-pox	Measles	Scarlet Fever	Whooping cough	Diphtheria	Influenza	Violence	Diarrhoea and Enteritis (under 2 years)	Total Deaths under One Year	Causes of Deaths Certified by Registered Medical Practitioners	Inquest Cases	Uncertified Causes of Death.

WEST GLOUCESTERSHIRE COMBINED DISTRICT

This year the Ministry of Health require that the Annual Report for 1925 shall be a Survey Report.

It was intimated in paragraph 13 of Circular 540 of the 18th December, 1924, that the Annual Report of the Medical Officer of Health for 1925 would be a Survey Report, and that in this Report the Medical Officer of Health should be prepared to deal comprehensively with :

- (a) The measure of progress made in the area during the preceding five years in the improvement of public health.
- (b) The extent and character of the changes made during that period in the public health services of the area (*e.g.*, housing, water supply, sewerage, scavenging or refuse disposal, food inspection, or other services affecting the environment of the inhabitants ; and maternity and child welfare schemes, schemes for the treatment of tuberculosis and venereal diseases, provision of isolation hospitals, or other services directed to the prevention or cure of disease in individuals).
- (c) Any further action of importance in the organisation or development of public health services contemplated by the Local Authority or considered desirable by the Medical Officer of Health, and that the subjects dealt with in the Report fall under the following main heads :—

Natural and Social Conditions of the Area.

General Provision of Health Services in the Area.

Sanitary Circumstances of the Area.

Housing.

Inspection and Supervision of Food.

Prevalence of, and Control over, Infectious Diseases.

Maternity and Child Welfare.

In 1924 the Assessable Value of the six districts amounted to £231,337 6s. 9d. This year the figures for Newnham Urban District were not obtainable, but assuming that the Assessable Value of Newnham has not depreciated this would mean that the Assessable Value of the whole West Gloucestershire Area amounts to £226,491 16s. 7d. This figure represents a fall in the Assessable Value which it is difficult to believe has occurred in view of the many new buildings which have been erected during the past 12 months. Assuming this figure to be correct then totalling the yield of 1d. rate as reported for each separate district, 1d. rate on the whole area represents the sum of £923 1s. 4d. In each part of the district half the salaries of the staff of the Health Service with the exception of that of the Health Visitor for East Dean is paid by an Exchequer grant, 1d. rate therefore more than covers the whole of the salaries of the Staff.

Before this Report went to Press, Coleford Urban District had come to form an integral part of the District which will on and after 1st April, 1926 be composed of :—

East Dean	} Rural Districts.	Awre	} Urban Districts.
Gloucester		Coleford	
Lydney		Newnham	
		Westbury	

this amalgamation of Districts is made with a view to economy.

NATURAL AND SOCIAL CONDITIONS OF THE AREA.

The greater part of the West Gloucestershire Combined Area is contained in the Forest of Dean which possesses the singular advantage of retaining the beautiful scenery of the woodlands and at the same time supporting a large mining population, thus differing from most of the mining districts, where the beauty of the country has had to be sacrificed to the economic conditions connected with the colliery industry. Lydney R.D. except for Lydney Town where there are Tin-plate works employing 520 hands, is chiefly an agricultural area. It is true that there is one colliery in the district, and the West Gloucestershire Power Company's Power Station adjoining the colliery, but these at present only afford employment to a comparatively small proportion of the population. Awre, Newnham and Westbury are Urban in name only, Gloucester Rural is partly suburban, but chiefly agricultural.

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

Provision for the Health Services is made in part by the Local Authorities and in part by the County Council, the latter having the control of Tuberculosis.

Amongst other important Health Legislation which came into operation in 1925 was the Milk and Dairies (Consolidation) Act, 1915. This Act became operative on the 1st September. It re-enacts a number of provisions contained in the Contagious Diseases (Animals) Act, and of Food and Drugs Act, with regard to Milk and Dairies. It also reproduces a number of amendments and new provisions which were contained in the Milk and Dairies Act, 1914, the operation of which was deferred owing to the war. By this new Act it will be necessary for the Local Authority to stop the supply of milk which is likely to cause Tuberculosis, and Section 4 contains an obligation to inspect dairies in certain cases. Thus :—

(1) If the M.O.H. of any Local Authority has reason to suspect that Tuberculosis is caused, or is likely to be caused, by the consumption of any milk which is being sold or exposed or kept for sale within the area of the Local Authority, he shall endeavour to ascertain the sources of supply, and on ascertaining the facts shall forthwith give notice of them to the M.O.H. of the County or County Borough in which the cows from which the milk is obtained are kept, whether the dairy where they are kept is within or without the area of the Local Authority, unless the Local Authority are themselves the Council of that County or County Borough.

(2) On the receipt of such notice it shall be the duty of the M.O.H. of the County or County Borough to cause the cattle in the dairy to be inspected, and to make such other investigations as may be necessary.

(3) Provides for opportunity for the parties reporting or concerned with supplying Tuberculous milk to employ a Veterinary Surgeon to watch in their interest.

(4) Provides that the M.O.H. who gave notice of suspected milk shall be furnished with copies of Bacteriological or Veterinary reports on the case concerned, and

shall give him information as to whether any action has been taken upon those reports and as to the nature of that action.

Section 8 empowers the M.O.H. or other person authorised by the Local Authority to take samples of milk within the area of the Local Authority.

Paragraph (3) of Section 8 provides that the M.O.H. of an area where suspected milk is sold, can, by giving notice in writing, require the M.O.H. or other authorised officer where the suspected milk is produced, to take samples, and paragraph (4) lays down that the Authority requiring samples to be taken shall be liable to defray any reasonable expenses incurred in the taking and examination of samples and the amount whereof shall in default of agreement be settled by the Ministry of Health.

Another Order which became operative on the same day as the Milk and Dairies (Consolidation) Act, 1915, was The Tuberculosis Order of 1925, issued by the Minister of Agriculture and Fisheries, providing for the slaughter of bovine animals affected with certain specified forms of Tuberculosis, and for the payment of compensation in respect of animals so slaughtered.

Another Order makes it illegal for anyone suffering from Respiratory Tuberculosis to have anything to do with the handling of milk, and empowers the M.O.H. to enforce the Order by legal methods after having failed to enforce the Order by means of persuasion.

The M.O.H. should take all the reasonable steps in his power to obtain satisfactory medical evidence as to the patient's condition where this Order is concerned, and it will be desirable to obtain a report by a pathologist as to the presence of tubercle bacilli in the patient's sputum and an examination of the patient by the Clinical Tuberculosis Officer of the County.

SANITARY CIRCUMSTANCES OF THE AREA.

Every year shows improvements in the Sanitary Condition of the area. In the towns and some rural or semi-rural places sewerage schemes have been carried out. East Dean and Gloucester Rural have regularly organised works for dealing with the sewage, at Soudley in the case of East Dean, and at Churchdown and Longford in that of Gloucester. Lydney has an efficient sewerage scheme discharging into the River Severn for the town. In the Rural Districts, the objectionable Privy Vaults for which the people have so strong a liking are being gradually replaced by septic tanks and filtration beds, or privy buckets. Water supply is carried out by the Municipalities of Lydney, East Dean, Newnham and Gloucester in certain parts of these districts, but there are still places where a public water supply could advantageously be installed at small outlay if only the people were less timid with respect to the initial outlay. Like other rural communities, the people are strongly opposed to change where it is a question of cost, and rather than incur expense they will in all weather fetch water in pails from a distance at great inconvenience and in certain instances drink water known to be polluted. Where polluted water is used for drinking purposes, apparently without serious detriment to health, an outbreak of water-borne disease will someday come as a rude awakening, and it will be grossly unfair if the M. O. H. is blamed for not having insisted on a water supply being installed. The long standing question of a water supply for Ruardean village has at length been settled as well as that of Ruardean Hill. In the case of Ruardean village a supply equal to 6 gallons per head per diem could be made available, but it is felt that any expenditure incurred for such an inadequate supply would not be allowed by the Ministry of Health, consequently an arrangement has now been come to by which East Dean water supply is extended to Ruardean village. The Chairman of East Dean R.D.C. (Mr Westaway) when discussing the matter

of a water supply held at a Parish Meeting at Ruardean on Saturday 31st October, 1925 said "that the water supply would necessitate what at first sight might appear a large increase in their rates but when the figures are analysed that which at first appearance seems to be a sum of 4/6 in the £ is really only 3/4 in the £, not an excessive amount for water. Take for example the case of a house rated at £6 a year the water rental would be £1 0s. 6d. With the 5% off, this was reduced to 19/6 and they would have their water for only a difference of 6d. plus the capital cost of 1/2. East Dean would have to pay a rate of 3/- in the £ for many years, so that the people of Ruardean would still be 1s. 10d. in the £ better off, and industrially and otherwise the conditions of the two districts were similar. They could not call a water rental a "rate" because they were getting something for it. When they came to average it, he did not think anybody could begrudge about 1d per head per day for water."

In the case of St. Briavels, the Vicarage, the Manse, (Congregational Minister's residence), two slaughter-houses, parochial school, and most of the private residences are without water, and water has to be fetched by hand, the few exceptions being some ten or twelve houses which in olden times were connected by pipes with the public well. It was proposed to connect the Vicarage with the public water supply where water at present is running to waste. But this was opposed on the ground that the waste water in the future would all be required when people realise the economic advantage of having a water supply in their own homes obtainable by turning on a tap. Further, the Crown Land Agent opposed the scheme for supplying water to one house and not having a supply "pro bono publico," on the ground that it was not advantageous to spend a large sum of money on laying on water to one house, when for a very little extra expenditure the whole community could enjoy the inestimable boon of water brought to their doors; and the scheme as proposed* would in times of drought be of no utility to the

* by the Church Council

Vicarage. The whole cost of a water scheme for St. Briavels Village could be defrayed by a water rental levied on the consumers. Owing to misunderstanding, the scheme was vigorously opposed at a largely attended Parish Meeting, principally composed of people living outside the proposed water supply area ; these came to protest against being called (as they had been led to suppose would be the case) to pay a rate from which they could not possibly derive any benefit.

Upton St. Leonards Parish is in a very similar state to that of St. Briavels Village, with the difference that whereas St. Briavels has a supply of pure water which is allowed to run to waste at Upton St. Leonards in the case of a number of houses there is no supply at all, and in the case of others the only water available is that obtained from an open ditch which receives the washings from the road. In both instances opposition has arisen through a dread of having to pay more in rates. These instances in West Gloucestershire are not singular, as shown by the case of Fordham in Cambridgeshire and other places, where it was freely admitted by most people that a water supply is needed for the sake of convenience, whereas the danger of drinking polluted water is not viewed with alarm in view of the fact that no serious outbreaks of water-borne disease have occurred in the past, or if they did they were not recognised as such.

Rubbish Dumps, Refuse not only belonging to the District, but in the case of Gloucester Rural District brought into the District from places beyond it, is dumped down in waste places, and the only attempt at disposing of it is by lighting fires. These refuse tips affording food for flies and rats give off such noxious smells that those living anywhere near are afraid to open their windows. The system of burying where proper destruction in incinerators is impracticable should be adopted. In the case of large towns, destructors if properly managed not only afford a hygienic method of disposing of house refuse but also provide material for road making, which is of great utility.

Westbury	1	0	1	1	1
Total for West Gloucestershire ..	47	72	54	89	188

* Also 10 of wood or other composite materials.

HOUSING. Great advances have been made during the past year in the housing conditions of the District, as will be seen on reference to the table showing the number of houses built partly by private enterprise and partly under Municipal Schemes, Gloucester and Lydney Rural Districts having been specially enterprising in these respects. The growth of buildings constructed of perishable materials, calculated to last at most 15 to 20 years is to be deplored. Still even a "Bungalette," as the House Agents describe some of these dwellings, is preferable to an overcrowded tenement.

INSPECTION AND SUPERVISION OF FOOD has been systematically carried out throughout the district. When the new regulations with regard to preservatives come into full force the need for Cold Storage will become evident. It is satisfactory to see that the need for Cold Storage Establishments has been realised and in various parts of the country these are being erected. A large building at Ruardean formerly a brewery, is now in process of transformation to a cold storage with the most up-to-date cooling and refrigerating appliances.

The Public Health (Meat) Regulations, 1924 which came into force on the 1st April should do a great deal to prevent the spread of diseases amongst cattle, and at the

same time protect the meat supply of the public. The circular issued by the Ministry of Health quotes paragraph 159 of the Report of the Departmental Committee on Foot and Mouth Disease of 1922, which is in the following terms :—

“ The use of private slaughter-houses (especially those attached to farms or dairies) has been responsible for the spread of disease in many districts. . . Further, the use of such slaughter-houses facilitates concealment of disease and involves great risk of its spread, but while it may not be practicable entirely to prohibit the use of private slaughter-houses we strongly urge that sanitary authorities should in the public interest refrain from licensing premises which are not so constructed as to permit of their effective disinfection.”

The most important clause in the new Order is the one which ensures that the provisions of the Public Health Acts relating to the regulation of slaughter-houses shall be in force throughout all Rural Districts. This is effected by means of the Rural District Councils (Slaughter-houses) Order, 1924.

It is satisfactory to note that Humane Slaughtering is gradually being adopted throughout the area. It has been made compulsory in two of the Rural Districts in West Gloucestershire, *viz.* :—Gloucester and Lydney, and the more enlightened amongst the butchers in the remainder of the area are voluntarily adopting humane killing. If the public would insist on their butchers employing humane methods the butchers would all adopt them.

The whole subject of Meat Inspection and Humane Slaughtering is distasteful to some sensitive people who boast that they would not willingly kill a fly. These people rather than face the question or do anything to improve our meat supply or do away with unnecessary suffering prefer to leave the subject severely alone. In one instance, I thought that this policy of “ *Laissez faire* ” might be

attributable to vegetarianism, but found on inquiry that it was not, and that the person concerned resented most strongly being even suspected of belonging to a class of cranks or persons which he considered mentally deficient.

PREVALENCE OF, AND CONTROL OVER, INFECTIOUS DISEASES. There was a noticeable reduction in the amount of Infectious Disease, particularly those included under the term “ Zymotic ” Diseases, as will be seen by reference to the table given.

	1921	1922	1923	1924	1925
Smallpox	—	—	216	119	—
Scarlet Fever	40	90	187	105	82
Diphtheria	20	44	41	69	33
Enteric	8	8	47	18	19
Puerperal Fever	2	1	1	1	4
Erysipelas	9	12	5	4	10
Measles	2	3	166	234	46

HOSPITAL ACCOMMODATION. This has been given under each particular District and the only alteration which has taken place is that Lydney, West Dean and Coleford are merged in the North West Gloucestershire Smallpox Hospital District and another Smallpox Hospital District has been formed for the N.E. of the County with a hospital near Cheltenham. Gloucester Rural District remains as before associated with Gloucester City for ordinary Infectious Diseases and Smallpox.

MATERNITY AND CHILD WELFARE. Maternity and Child Welfare is everywhere receiving more attention, but nowhere has it been dealt with more thoroughly than in Cinderford, where for the past eleven years the Infant Welfare centre has flourished under the superintendence of Dr. Rigden, who, I regret to say, is leaving the district, and in this his last report he draws attention to the importance of starting an ante-natal branch.

BIRTHS AND DEATHS : —The facts with regard to these matters are given in Tabular Form and as it is important to reduce the size of the Report I must request everyone who reads this report to study these figures which will thus obviate the need for comment from me.

LIST OF SCHOOLS CLOSED ON ACCOUNT OF INFECTIOUS DISEASES IN 1925., It will be noticed that the number of Schools closed in 1925 is remarkably small, this does not mean that the need for closure did not arise, but merely that the procedure laid down in the Circular letter (No 331) of the Secretary for Education dated 25.1.1925 were strictly observed. During epidemics of infectious disease the advisability of allowing schools in Rural areas to remain unclosed is open to question. It must often happen in rural areas that if the school is closed, the chief if not the only opportunity for meeting is cut off for the majority of the children who live far apart in a scattered district. In a town or district where the population is denser this is different and the Board of Education Rule excellent. Throughout 1925 frequent complaints were made respecting the non-closure of schools.

EAST DEAN & UNITED PARISHES RURAL DISTRICT

Composition of District: The *Township* of East Dean, comprising the Blakeney Hill, Cinderford, Drybrook, Joy's Green, Plump, Pope's Hill and Ruspidge Wards ; and the *Civil Parishes* of Abenhall, Blaisdon, Bulley, Churcham, Flaxley, Huntley, Littledean, Longhope, Minsterworth, Mitcheldean, and Ruardean

1.—GENERAL STATISTICS—Area (Acres), 28,626.

Population (1921), 20,486 ; at end of 1925, 21,450.

Number of Inhabited Houses (1921), 4620.

Number of families or separate occupiers, 1921 : 4759.

Rateable Value, £52,238.

Sum represented by a penny rate : for East Dean
with outlying Parishes, £201 0 0.

2.—EXTRACTS FROM VITAL STATISTICS OF THE YEAR—

		Total	M	F	
Births	{ Legitimate	452	231	221	Birth-rate 22·05
	{ Illegitimate	21	6	15	(R.G.)
Deaths	260	150	110	Death-rate 12·12
					(R.G.)

Deaths of infants under 1 year per 1000 births—63·4

Legitimate	57·06	} Total 63·4.
Illegitimate	6·34	

Deaths from Measles (all ages)	0
„ Whooping Cough (all ages)	..	2
„ Diarrhoea (under 2 years)	..	1

3.—NOTIFIABLE DISEASES DURING THE YEAR—

Disease	Total Cases Notified	Cases admitted to Hospital	Total Deaths
Diphtheria	19	19	0
Scarlet Fever	42	40	0
Enteric Fever (including Paratyphoid)	2	1	0
Puerperal Fever	2	0	1
Pneumonia	24	0	16
Other diseases generally notifiable. Enceph. Lethargica	0	0	1
Tuberculosis :—			
(a) Pulmonary	M 10 F 12 Total 22	M 10 F 7 17	M 4 F 8 12
(b) Non-Pulmonary	M 1 F 2 Total 3	M 1 F 4 5	M 0 F 1 1
Ophthalmia Neonatorum ..	Notified. 1	Treated at home. 1	Treated in hospital. 0
			Vision Unmpaired. 1

4.—SICKNESS DURING YEAR—

Measles during the latter part of the year.

5.—Hospitals and other Institutions available for the District :

(a) Hospitals provided or subsidised by the Local Authority or by the County Council :

(1) Tuberculosis :

Standish House, Beds for Males	73	} 177
„ „ Females	26	
„ „ Children	78	

(2) Maternity. No. of Beds :

Gloucester D.N.A., 4 beds.

Cheltenham D.N.A., 4 beds

(3) Children. No. of Beds. None.

(4) Fever. No. of Beds : 40, 6 cots and 6 for staff.

Total 52.

(5) Smallpox. No. of Beds : 50 and 5 for staff.

Total 55.

(b) Ambulance { (a) for infectious cases. Two Motors,
Facilities { one for Smallpox.
(b) for non-infectious cases.

THE EAST DEAN AND UNITED PARISHES RURAL DISTRICT
URBAN POWERS ORDER, 1925.

(This Order came into operation 1st June, 1925).

EPITOME OF THE URBAN POWERS GRANTED BY THE ORDERS.

AS TO THE WHOLE OF THE DISTRICT AND UNITED PARISHES.

PUBLIC HEALTH ACTS, 1875—

Sections 149 and 160.

TOWNS IMPROVEMENTS CLAUSES ACT, 1847—

Sections 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76,
77, 78, 79, 80, 81, 82 and 83.

PUBLIC HEALTH ACTS, 1875—

Section 171.

TOWNS POLICE CLAUSES ACT, 1847—

Sections 21, 28, 29, 30, and 31.

PUBLIC HEALTH ACTS (AMENDMENT) ACT, 1890.

Sections 13, 14, 15, 16, 17, 21, 22, 23, 24, 25, 26, 27, 28,
32, 33, 34, 35, 36, 37, 38, 39, 47, 48, 49, Part 4.

In the contributory places of Abenhall, Churcham,
East Dean, Huntley, Littledean, Longhope, Mintersworth,
Mitcheldean and Ruardean.

(a) THE TOWN POLICE CLAUSES ACT, 1847.

(b) THE TOWN POLICE CLAUSES ACT, 1889

(c) PUBLIC HEALTH ACT, 1875—

Section 171.

In the contributory places of East Dean and Mitcheldean.

THE PUBLIC HEALTH ACT, 1875—

Sections 42, 44 and 157.

As to the contributory place of East Dean.

THE PUBLIC HEALTH ACT, 1875—

Sections 39, 150, 151 and 165.

THE PUBLIC HEALTH ACTS AMENDMENT ACT, 1890—

Sections 20, 41 and 43.

In the contributory place of Ruardean.

PUBLIC HEALTH ACT, 1875—

Section 172.

NOTE.—This section applies to that portion of the River
Wye which is in the parish of Ruardean.

CINDERFORD MOTHERS' CLUB AND BABIES' WELCOME

ELEVENTH ANNUAL REPORT

BY DR. G. F. RIGDEN, M.C., MEDICAL OFFICER.

STATISTICAL TABLE

Year	Number of Openings	Total of Attendances	Average Attendance per Session	Maximum Attendance at any one Session	New Names added to Register during Year	Value in pounds of Goods supplied		Notes
						Dried Milk, &c.	Wool, etc.	
1915	25	390	16	29	82	—	—	Opened in June.
1916	45	919	20	—	92	—	—	Health Visitor appointed.
1917	43	739	17	—	74	—	—	
1918	—	—	—	—	87	73	—	Year ending Mar. 31, 1919
1919	45	1125	25	—	102	100	50

1925	52	1553	29	51	189	175	30	

There have been no fresh developments during the past year, the existing work having been well maintained as shown by the tabulated figures.

The immediate future holds out more possibilities than the immediate past as I understand that there is a movement to terminate the rather unusual system by which the District Council and the County Council share the responsibility for Maternity and Child Welfare in this rural district. In this connection it is very gratifying to me to note that the District Council make it a first consideration before handing over full control to the County that the work of our Infant Welfare Centre shall continue unimpaired.

At the moment of writing negotiations are still in progress and the future is uncertain. I hope however,

that, if changes are made, the opportunity will be taken to start an Ante-Natal Branch for which I think, public opinion is now ready. I have referred to the desirability of this in several previous reports and the value of ante-natal work is generally recognised by those interested in Infant Welfare. The difficulty has been to convert the general public ; and more especially that part of the general public for whom mainly the clinic exists, as in private practice one finds increasingly that patients not only tolerate but demand ante-natal care. Now that the great bulk of the Maternity work, at any rate in Cinderford, is done by qualified midwives, themselves educated to the value of ante-natal work and possessing such great influence over their patients, I think the old difficulty of persuading expectant mothers to attend will be found to have disappeared; and for this reason, as well as for the fact that the whole situation is now under review, I consider that the present is an ideal time for embarking on this new undertaking

As I am leaving Cinderford this year, this will be my last Report. I have watched with the greatest interest the work of the Centre and done my best to guide it from its first halting footsteps as a voluntary effort to the established position which it occupies to-day ; I trust I have taught the mothers something and I know they have taught me much. I have been fortunate throughout in having a loyal and enthusiastic body of voluntary lady helpers ; whatever we may have accomplished, and I think we have some justification for pride in our work, has been accomplished by unselfish team work. There are, I am sure, equally bright times for the future.

G. F. RIGDEN, M.B., B.S. (Lond.)

SURVEYOR'S REPORT

SUMMARY OF WORK FOR 1925.

WATER SUPPLY—EAST DEAN.—The trunk mains laid in the south part of the district were completed at the end of 1924 and made available for the laying of small service mains and the connection of house services in 1925. The whole of the district of East Dean extending from the bottom of Ruspidge to the boundary of the Township at Viney Hill is now supplied from the Littledean Hill Reservoir at Cinderford, into which Reservoir the water is pumped from the source of supply at Greenbottom. The Blakeney Hill source is now superseded by the Greenbottom supply and the whole area of the Township of East Dean is or can be supplied from the centralised source at Greenbottom.

During the year the extension of the water mains in the Plump Hill district of East Dean has been completed and good progress made with the attachment of house services

At the commencement of 1923 and previous to the trunk main extensions in the NW, S, and NE parts of East Dean, the number of houses supplied for domestic purposes was 2,300 together with 33 meter supplies for public or trade purposes.

Since the trunk main extensions in 1923 the following house services have been attached to the mains : —

Ruardean Hill and Joys Green, N.W.	373
Plump Hill, N.E. 	80
Soudley, Brains Green and Viney Hill, S.	94
New House Services in Cinderford and district 	71
	<hr/>
	618

The total number of houses now supplied with water for domestic purposes in the Township of East Dean from the Greenbottom source is 2918 embracing a population of say, 13,130.

Applications for house service supplies are still coming in and I do not think the time is far distant when the whole of the Township may be supplied.

DRAINAGE.

Efforts have been concentrated on the work of water extensions and there has been no extension of the sewers during the past year, but where possible all new houses have been connected with the existing public sewers.

The work of sewage disposal has proceeded without complaint or unexpected trouble.

SCAVENGING & STREET CLEANING.

This work has been regularly and carefully performed during the year and there seems to have been no complaint of the accumulation of offensive refuse on private premises in those portions of the district within the scavenging area.

Considerable trouble and annoyance is caused to the owners of property near the refuse tips by the scattering of waste paper during windy weather. This waste paper comes chiefly from the premises of tradespeople. Burning is the only remedy at the tips—it is a pity the tradespeople do not obviate the necessity of collecting this waste paper by burning it themselves.

HOUSING

No houses were built by the Council during 1925 but private enterprise in view of the prevailing high cost of labour and materials did very well.

The following list gives proposals submitted, the work completed and the work still in hand or meditated.

Plans submitted for non-subsidy houses in 1925	10
Completed during the year	8
Still in course of construction	1
Not commenced	1
	<hr/>
	10
No. of non-subsidy houses commenced in 1924 and completed in 1925 ..	4
Alterations, additions, and improvement to existing houses	9

It will be observed from these particulars that during 1925—32 houses were made available for occupation and that 9 houses were enlarged or improved.

WM. WHITEHOUSE,
Surveyor.

Report of MR A. W. COLLINSON, Sanitary Inspector.

HOUSING :

Number of new houses erected during the year :—			
(a) Total	32
(b) As part of a municipal housing scheme	0
Houses inspected	1025
Houses inspected under Housing (Inspection of District) Regulations, 1910	203
Houses unfit for habitation	3
Houses found not to be in all respects reasonably fit for habitation..	3
Houses rendered fit	1
(a) Under Sec. 28, Housing, Town Planning Act, 1910—			
Houses for which notices were served..		..	1
No. rendered fit (by owner)	1
(b) Under other Public Health Acts			
Notices served	49
No. remedied (by owner)	44
(c) Under Secs. 17 & 18 Housing, Town Planning Act, 1909			
Representations to District Council	3
Closing Orders	3
No. rendered fit	1

WATER SUPPLY :

(a) Is there deficiency in any part, if so, what part or parts ? Wigpool	} Vide Report of Surveyor
(b) Has there been any change in the existing sources of supply ?	
(c) Has any application for a Loan been made ?	
(1) Amount	
(2) Purpose	
(d) Number of new connections with public supply	
(e) Number of wells sunk, or improved sources of supply provided	

SEWERAGE AND DRAINAGE.

(a) In what parishes, if any, is there need for a Sewerage system : Drybrook, Ruardean, Mitcheldean	
(d) W.C.'s newly supplied with flushing cisterns..	19
(e) Number of earth closets, pail closets, or improved privies constructed	15
(f) Number of notices served to empty " Privy Vaults "	15
(g) Number of privy vaults abolished	17

NUMBERS INSPECTED OF EACH OF THE FOLLOWING :

	No. on Register	No. Inspected	Total No. of Inspections
Common Lodging houses	1	1	2
Slaughter-houses	16	16	479
Bakehouses	19	19	46
Dairies, Cowsheds and Milkshops	103	98	117
Workshops	20	18	18

GENERAL :

Complaints received	40
Nuisances reported to District Council	78
Swine	3
Preliminary notices served	85
Statutory notices served	70
Summonses	1
Convictions	1
Disinfected	64

Methods of Disinfection used—Formalin Spray and
Fumigation.

Signed A. W. COLLINSON,

Sanitary Inspector.

ANNUAL REPORT

OF THE

Medical Officer of Health for the Year 1925,

FOR THE

RURAL DISTRICT OF EAST DEAN AND UNITED PARISHES

(Form 572. Nov., 1925)

On the administration of the Factory and Workshop Act, 1901, in
connection with FACTORIES, WORKSHOPS AND WORKPLACES.

1.—INSPECTION OF FACTORIES, WORKSHOPS AND WORKPLACES.

(Including Inspections made by Sanitary Inspectors or Inspectors of Nuisances).

Premises	No. of Inspec- tions	No. of Written Notices	No. of Prose- cutions
Factories (including Factory Laundries) ..	2	0	0
Workshops (including Workshop Laundries)	65	0	0
Workplaces (other than Outworkers' premises)	2	0	0
Total	69	0	0

2.—DEFECTS FOUND IN FACTORIES, WORKSHOPS AND WORKPLACES.

*Nuisances under the Public Health Acts :—**

Particulars	No. of Defects				Referred to H.M. Inspector	No. of prose- cutions
	Found	Remedied				
Want of cleanliness.. ..	0	0		0		0
Want of ventilation	0	0		0		0
Overcrowding	0	0		0		0
Want of drainage of floors..	1	1		0		0
Other nuisances	2	2		0		0
Sanitary accommodation :—						
Insufficient	0	0		0		0
Unsuitable or defective ..	0	0		0		0
Not separate for sexes ..	0	0		0		0

Offences under the Factory and Workshops Acts :—

Illegal occupation of underground bakehouse (s. 101)	0	0		0		0
Other offences	0	0		0		0

(Excluding offences relating to out-
work and offences under the
Sections mentioned in the Sched-
ule to the Ministry of Health
(Factories and Workshops Trans-
fer of Powers) Order, 1921).

Total	3	3		0		0
---------------	---	---	--	---	--	---

* Including those specified in sections 2, 3, 7 and 8 of the Factory and Workshop Act, 1901, as remediable under the Public Health Acts.

GLOUCESTER RURAL DISTRICT

Composition of District: Parishes of Highnam, Lassington, Maisemore, Ashleworth, Sandhurst, Norton, Down Hatherley, Churchdown, Barnwood, Hempsted, Matson, Upton St. Leonards, Prinknash, Brockworth, Whaddon, Quedgeley, Twigworth, Tuffley, Hucclecote, Elmore, Wotton St. Mary (Without) and Wotton Vill.

1.—GENERAL STATISTICS—Area (Acres) 30,680.

Population (1921), 13,113; in 1925, 13,270.

Number of inhabited houses (1921), 2735.

Number of families or separate occupiers (1921), 2829.

Rateable Value, £127,814. Assessable Value £93,010.

Sum represented by a penny rate, £387 10s. 10d.

2.—EXTRACTS FROM VITAL STATISTICS OF THE YEAR—

		Total	M	F	
Births	Legitimate	188 ..	100 ..	88	Birth-rate 14·01 (R.G.)

SURVEYOR'S REPORT.

NOTES AS TO WORKS OF SEWERING DONE 1925 AND 1926.

In February 1926 a sewer for the drainage of Oxstalls Lane, that portion of the Cheltenham Road between Elmbridge Road and Horsbere Brook, and the new By-pass road was commenced. This sewer starts from the main 15" sewer in the meadows and crosses Oxstalls Lane at its lowest point, thence proceeds across fields to the north end of Elmbridge Road, along the By-pass road to Horsbere Brook and back to King Edward Inn. This portion of the sewer is complete. About half of the sewer required in Oxstalls Road has been completed, the remainder will be finished during the month. A branch of the main sewer which will extend from Elmbridge Road to the King Edward Inn will be put in hand as soon as the Oxstalls Lane branch is finished. As house building was proceeding rapidly in Elmbridge Road it was decided to lay a branch sewer from the new main sewer to Elmbridge Field Farm, there to meet the summit of the existing sewer in Elmbridge Road which runs into the London Road sewer. This has been done. Some forty houses have already been connected with the new sewers.

Signed, W. FITZGERALD JONES

Surveyor

NORTH END SPECIAL DRAINAGE DISTRICT

(GLOUCESTER R.D.)

Area of District 4884 acres

Population $\left\{ \begin{array}{l} 1901 \quad 3434 \\ 1911 \text{ Census } 4627. \text{ Now (estimated) } 5156. \\ 1921 \quad 4956 \end{array} \right.$

Annual Assessable Value of the N.E.S.D.D. (for purposes of this application), £34,193.

Outstanding Loans £8185 } £8185 (in respect of the
Unexercised Sanctions } N.E.S.D.D.)

Margin of borrowing power remaining for purposes of this application, £60,201.

Total Debt for all purposes, £9,310 (in respect of the N.E.S.D.D.)

Present Application, £3,903.

Period asked for 30, years.

Overdrafts on Capital Account due to Council, £1,125 approximately.

Amount produced by a penny rate, £142 9s 5d.

Total rates in the £ in respect of N.E.S.D.D. Current year 1/1 ($\frac{1}{2}$ yr. 4/6).

Previous year 1924/5 1/2 (11/6)

Previous year 1923/4 1/3 (9/10).

Estimated increase due to proposals, 2 $\frac{1}{2}$ d.

Outstanding Debts on works to be superseded, £

Works commenced 5th February, 1925.

Payments made in anticipation of proposed loan, £1,125 approximately.

Payments included in closed and audited accounts, None.

Payments proposed to Salaried Officers or Permanent Workmen, £250.

Works outside District, None.

No Objections made

There was no opposition.

Report of MR G. H. RAWLING,
Sanitary Inspector.
